Building a Squirrel Box

Materials:

Use Untreated Lumber

1' x 8" x 96" piece of lumber (cedar)

17 deck screws

Tools:

bench saw

electric drill

2 1/2" hole saw w/
mandrel

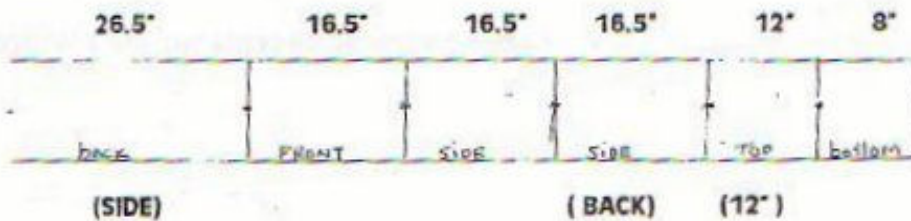

tape measure

pencil

*step #1:

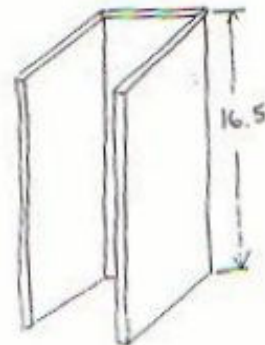

cut lumber as follows: 1 piece 26.5" (SIDE), 3 pieces 16.5" (1 side,
1 front, 1 BACK),

1 piece 12" (top), remaining 8" piece will serve as box bottom.

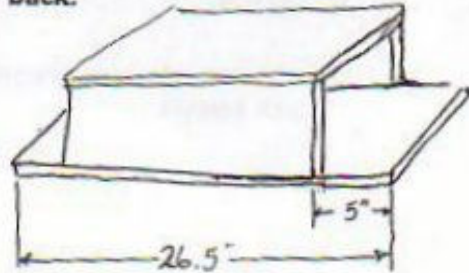

*step #2:

Attach THE THREE 16.5" PIECES

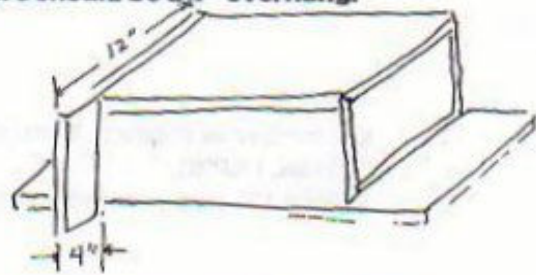

Squirrel Box page 2

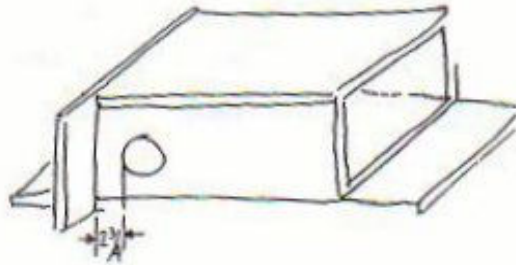

***step #3:**
Center and attach 16.5" pieces to 26.5" back.
5" from either end.

***step #4:**
Attach top to one end of the box. There should be a 4" overhang.

***step #5:**
Cut hole in side of box. Top of hole should be centered and 2 3/4" from top of box.

***step #6:**
Attach bottom of box.
